

6 Cranial Subluxation Correction			
Procedures	103	Palpation of the Sutures and Fontanelles	149
Cranial Bone and CSF Basic Movement and Physiology	103	Internal Palpation of the Palate	150
General Rules, Guidelines and Classifications for Cranial Corrections	105	Companion Techniques for Cranial Specific Corrections	151
Cranial Adjusting Techniques	107	Specific Cranial Corrective Techniques	152
CSF Directing and Balancing Techniques	107	Condition Specific Cranial Subluxation Patterns	152
Occipital Bone Extra-oral Techniques	109	Determining Ascending or Descending Primary Subluxation	154
Sphenobasilar Mechanism	110		
Sphenoid Bone Extra-Oral Techniques	113	9 Condition Specific Protocols	155
Temporal Bone Extra-Oral Techniques	114	Asthma	155
Frontal Bone Extra-oral Techniques	117	Allergies	156
Intra-Oral Reflex and Balancing Corrections	118	Colic	157
Condition Specific Techniques	119	Coughs, Colds and Sinuses	159
CSF Directing and Closing Techniques	122	Constipation/Diarrhea	160
7 Intra-Oral Unassisted Cranial Bone Corrections	125	Digestive Issues	161
Occipital Bone	126	Eczema	162
Temporal Bone	127	Ear Infections/Earaches	163
Frontal Bone	130	Fever	164
Parietal Bone	133	Headaches	165
Maxillary/Sphenoid Suture, Maxillary/Palatine Suture And Sphenobasilar Corrections	134	Insomnia	165
Maxilla, Palatine, and Malar/Zygoma bones	140	Teething	166
8 Correlation of Clinical Findings	145	Tongue-tie	167
Examination Findings Age 3+	147	Pain Control in the Pediatric Patient	169
Correlation and Clinical Application of Cranial Indicators and Techniques	148	Pituitary Inhibition Correction	172
Cranial Evaluation Findings	148	Temporal Sphenoidal (TS) Line Spinal and Visceral Synchronization	172
Cranial Nerve Involvement	149
